Contractors on Deployed Operations (CONDO)
Refresher Training Course

About the Course

This intensive 1-day refresher course is designed for contractors who have previously completed hostile environment or deployment training and require an update to remain current, competent, and deployment-ready.

Covering essential safety, situational awareness, and emergency response skills, the course reinforces confidence and ensures alignment with evolving threat landscapes and operational best practices.

The Focused Refresher Training for Operational Readiness in Dynamic Environments Course, provides an efficient yet comprehensive update on critical safety and operational competencies for individuals working in low-to-high-threat environments. This course ensures that participants retain key knowledge, understand current threat trends, and can respond effectively to incidents in the field.

With a focus on realistic scenarios and rapid-response decision-making, this refresher enhances field readiness, reduces risk, and reinforces duty-of-care obligations for employers deploying contractors to challenging environments.

Why Choose This Course

- ✓ One of the SPG Hostile Environment Readiness Training (HERT) Programme Courses, designed by experienced professionals with operational backgrounds in global deployments.

- ✓ Delivered by experienced former Elite UK Military and Private Security Company (PSC) Course Directing Staff (DS) with real-world, hostile environment leadership experience.
- ✓ Delivers essential updates without the time commitment of a full course.
- ✓ Focuses on practical application, scenario refreshers, and threat awareness.
- ✓ Maintains compliance with employer and insurance training currency requirements.
- ✓ Ideal for maintaining operational confidence before redeployment.

Course Aim

To refresh and reinforce the critical safety, security, and situational skills required by contractors working in deployed environments, ensuring continued competence, confidence, and compliance.

Learning Objectives

By the end of the course, participants will:

- ✓ Reaffirm core personal safety and threat mitigation principles.
- ✓ Revisit emergency response protocols, including medical and evacuation drills.
- ✓ Recognise updated threat profiles and operational changes.
- ✓ Practice communication and reporting procedures under pressure.
- ✓ Strengthen awareness of evolving local, cultural, and security contexts.

Learning Outcomes

Participants will leave the course with the ability to:

1. Respond confidently and correctly to common threats in the field.
2. Identify and adapt to updated operational or regional risks.
3. Apply core security and safety practices with minimal instruction.
4. Maintain effective team communication during incidents.
5. Fulfil deployment readiness standards with current, validated training.

Course Subjects

- Threat Environment Update and Risk Awareness
- Core Principles of Personal Security and Conduct
- Incident Response and Emergency Communication
- First Aid and Casualty Care Refresher
- Evacuation Planning and Scenario Exercises
- Cultural Awareness and Behavioural Risk Mitigation
- Current Best Practices in Information and Operational Security

Target Audience

- Civilian contractors due for redeployment or rotation into operational environments.
- Individuals with prior hostile environment or field operations training.

- Employers seeking to maintain compliance with training currency standards.

Prerequisites

- Previous completion of a recognised CONDO 2-day (Low to Medium-Threat) or CONDO 3-day (High-Threat) training course (within the last 3 years is recommended).
- Medical fitness suitable for light physical activity and scenario-based exercises.
- Basic English proficiency (or the course delivery language).

Course Certificate

Upon completion of this CONDO Course, course participants will receive a Certificate in CONDO Refresher Course
